Subject Index

January-February pp. 1-42
March-April pp. 43-98
May-June pp. 99-154
July-August pp. 155-232
September-October pp. 233-286
November-December pp. 287-342

A

A antigen and acute leukemia 3
ABO incompatibility 322
ACD, nonbiochemical variables of blood storage in 233
Adenine 17
ADP 317
Age distribution of stored blood 182, 194, 203, 215
Age matching 182, 194, 203, 215
Aged platelets 52
Agitation of stored blood 155
Albumin polymers 264
Animal models 41
Anti-A in Factor VIII concentrates 139
Antibodies, Rh blocking 67
Anti-Dp 254
Anti-El 254
Antiglobulin test, positive, after liver transplant 133
Anti-I 133
Anti-Lan 254
Antilymphocyte globulin 133
Anti-M 133
Anti-So 254
A substance in serum, H familial increase 6
Australia antigen 221
Autoimmune hemolytic anemia 310
Autologous cold antibodies 133
Automated
  call-up of donors 121
  differential agglutination 287

B

Bacterial contamination 329
Basic computer language 182, 194, 203, 215
Blocking antibodies, Rh 67
Blood
  banks 182, 194, 203, 215
  cells, rapid separation of 223
  donors, registration of 121
  donors, social psychology, demographic profiles, comparison between voluntary and paid 79, 84
  inventory 182, 194, 203, 215
  preservation 17
  storage 113, 299
  volume 171

C

Central blood inventory 182, 194, 203, 215
Chicken antihuman red blood cell serum 21
Chromium labeling 163
^{51}Chromium 287
  elution of 163
Cold agglutinins, microtitration of 33
Complement preservation 14
Computers
  costs of 182, 194, 203, 215
  in blood transfusion 121
Cryoprecipitate 326
Culture of platelet preparations 315
Czajkowski, J. R. 98

D

Data base 182, 194, 203, 215
Diego^{b} (Di^{b}) 279
Differential agglutination 163
2,3-diphosphoglycerate 17, 113, 299
Donors
  polycythemic 10
  reactions of 272

E

Elution of ^{51}Cr 287
Erythrocyte preservation, nonbiochemical variables of 233
Ethanol fractionation 264
Extracorporeal circulation and coagulation changes 238

F

Factor VIII concentrates 139
Family study of Rh_{null} 89
Fetomaternal transfusion reaction 322
Fibrinogen 326
Fibrinolysis 317
Freezing damage 17
Frozen
  blood 238
  red blood cells, agglutination of, continuous washing of, EDTA, recovery *in vitro*, survival *in vivo*, time of storage 102
  storage of blood 17

G

Genetic stocks 41

H

Hemoglobin 299
Hemoglobin S and increased A activity in serum 6
Hemoglobinuria 238
Hemolytic
  anemia acquired from transfused anti-A .. 139
  disease of the newborn 76
  transfusion reactions 317
Heparin 317
Hepatic coma 26
Hepatitis screening 221
HL-A typing 21
Hospital blood inventory 182, 194, 203, 215
Human albumin 264

I

Immunosuppression by anti-Rh 143
Intravascular coagulation 317

K

Knops–Helgeson (Kn^{a}) 137

November-December pp. 287-342

A

A antigen and acute leukemia 3
ABO incompatibility 322
ACD, nonbiochemical variables of blood storage in 233
Adenine 17
ADP 317
Age distribution of stored blood 182, 194, 203, 215
Age matching 182, 194, 203, 215
Aged platelets 52
Agitation of stored blood 155
Albumin polymers 264
Animal models 41
Anti-A in Factor VIII concentrates 139
Antibodies, Rh blocking 67
Anti-Dp 254
Anti-El 254
Antiglobulin test, positive, after liver transplant 133
Anti-I 133
Anti-Lan 254
Antilymphocyte globulin 133
Anti-M 133
Anti-So 254
A substance in serum, H familial increase 6
Australia antigen 221
Autoimmune hemolytic anemia 310
Autologous cold antibodies 133
Automated
  call-up of donors 121
  differential agglutination 287

B

Bacterial contamination 329
Basic computer language 182, 194, 203, 215
Blocking antibodies, Rh 67
Blood
  banks 182, 194, 203, 215
  cells, rapid separation of 223
  donors, registration of 121
  donors, social psychology, demographic profiles, comparison between voluntary and paid 79, 84
  inventory 182, 194, 203, 215
  preservation 17
  storage 113, 299
  volume 171

C

Central blood inventory 182, 194, 203, 215
Chicken antihuman red blood cell serum 21
Chromium labeling 163
^{51}Chromium 287
  elution of 163
Cold agglutinins, microtitration of 33
Complement preservation 14
Computers
  costs of 182, 194, 203, 215
  in blood transfusion 121
Cryoprecipitate 326
Culture of platelet preparations 315
Czajkowski, J. R. 98

D

Data base 182, 194, 203, 215
Diego^{b} (Di^{b}) 279
Differential agglutination 163
2,3-diphosphoglycerate 17, 113, 299
Donors
  polycythemic 10
  reactions of 272

E

Elution of ^{51}Cr 287
Erythrocyte preservation, nonbiochemical variables of 233
Ethanol fractionation 264
Extracorporeal circulation and coagulation changes 238

F

Factor VIII concentrates 139
Family study of Rh_{null} 89
Fetomaternal transfusion reaction 322
Fibrinogen 326
Fibrinolysis 317
Freezing damage 17
Frozen
  blood 238
  red blood cells, agglutination of, continuous washing of, EDTA, recovery *in vitro*, survival *in vivo*, time of storage 102
  storage of blood 17

G

Genetic stocks 41

H

Hemoglobin 299
Hemoglobin S and increased A activity in serum 6
Hemoglobinuria 238
Hemolytic
  anemia acquired from transfused anti-A .. 139
  disease of the newborn 76
  transfusion reactions 317
Heparin 317
Hepatic coma 26
Hepatitis screening 221
HL-A typing 21
Hospital blood inventory 182, 194, 203, 215
Human albumin 264

I

Immunosuppression by anti-Rh 143
Intravascular coagulation 317

K

Knops–Helgeson (Kn^{a}) 137

L

Leukemia and A antigen 3
Liver transplant followed by I and M hemagglutinins 133
Long-term plasmapheresis effects 58
Lymphocyte isolation, preservation viability ... 21

M

Macroglobulinemia 310
Management performance system 182, 194, 203, 215
Microplates for antibody identification, antibody screening, antiglobulin tests, blood typing 258
Microtitration of cold agglutinins 33

N

NCI-IBM continuous-flow blood cell separator 26
Neonatal erythrocytes, delayed Rh reactivity .. 247

O

Operating costs 182, 194, 203, 215
Oxygen dissociation 113

P

Plasma
exchange transfusion 26
hemoglobin 238
volume 171
Plasmapheresis components from AB blood donors 58
Plastic plates 258
Platelet (s) 317
concentrates 52, 315
concentrates, sterility of 329
levels 238
preparations, room temperature storage .. 315
storage 52
storage, hypotonic swelling, osmotic stress, temperature 305
transfusion 52
Polyagglutinability 43
Polycythemic donors 10
Preservation of complement 14

Q

Quality control 272

R

Record keeping 182, 194, 203, 215
Red blood cell
function of 299
life span of 287
mass of 171
membrane of 17
preservation, of nonbiochemical variables . 233
survival of 17
survival of, during open-heart surgery 163
survival of, *in vivo* 43
Renal function 238
Rh
antigen, delayed reactivity 247
blocking antibodies 67
immunoglobulin 76
Rh_{null}, cell survival 89
Room temperature platelet storage 52

S

Splenomegaly 171
Statistics 182, 194, 203, 215
Survival of two red blood cell populations 163

T

T-antigen 43
Teletype 182, 194, 203, 215
Temperature of stored blood 155
Time-sharing 182, 194, 203, 215
Tissue-typing 21
Transfused anti-A 139
Transfusion
intrauterine 247
reactions to 322
Transplacental hemorrhage 76
Trigonella foenum graecum 21

V

Venous hematocrit 171

W

Witebsky, E. 97
